

What am I did during the APNG camp?

Firstly I'm pure-hearted thanks to APNG camp committee to organize such a great camp to us.

It was my first time to know and keep good relationship with people who came from more than 10 countries. Because of APNG I went through many magical experiences which I never had been faced. During the camp firstly I heard several important lectures which were useful for future. Although I did not understanding very much due to my basic knowledge, I could feel the atmosphere of development of networking area.

I did my team project presentation on 2nd track on 29 Aug and sang an ethical song during the costume party. On the WG discussion, I had learned some basal knowledge of live-E project. Finally during the team building I was in team 2 and got to know some traditional food in Xi'an.

Which session that I was like?

It is a good idea that we can have a costume party during the camp. I can find the ethos of each people on their national dresses. And also find difference color among the each folk. During the costume party I found funny thing. We are Korean Chinese. So when we sang Korean song with Korean dress it was fun. But when Chinese prepared their show then I was thought "I'm also a Chinese, so I have to join with them." So include Yubong and Aeayong, three of us join again with Chinese people to sing a Chinese song to the APNG.

At that time an interesting reflection came through in my mind "Is that t

he nationality comes first or the folk comes first?"

Which session that I was dislike? (Recommendation)

Everything in APNG camp was fresh to me. I can not tell about what is not good for APNG camp. But as a college student, the content of APNG was a little bit academic to me. So I just want to give a small recommendation that we do not need to sit in the assembly room all day long. We can go outside to experience what we learned on the camp. Although it was concern about internet or networking we can find some where to apply it. For instance we can apply live-E project on some company in the local place not in the hotel.

And it was a pity that all participants did not going out to visit some show places together.

Finally thanks again to APNG camp and all participants. We had made a great camp. And hope next camp which would hold in Bangkok will also give us a pleasantly surprised.
